

clik-trip Biography

Who?

clik-trip was started by the acclaimed photographer Suzanne Porter, who works worldwide, lives in France, but whose heart is in Morocco.

What?

clik-trip is a new market place, linking passionate photography enthusiasts with local photography experts.

clik-trip sources photographers and unique photographic experiences all over the world and gathers them in one place.

Why?

During her work giving photography tours, Suzanne Porter, the founder of clik-trip, spent many hours discussing photography with her customers and one common topic that kept coming up is the difficulty researching reliable and high quality photography workshops and tours. Even after hours of research and planning, the experience can often finish in disappointment.

Everyone has different interests and needs, whether it be genre, level of photography, location etc. But all have one common aim:

To be able to book a unique experience simply and securely, with someone they can trust.

When?

clik-trip was born in April 2019 to fill this need.

In that short time, 70 experienced photographers have been signed up in 40 countries, with more being added every month.

All clik-trip photographers have been 'tried & tested' or are invited on a recommendation. They have local knowledge as well as experience and provide unequalled access for photography enthusiasts.

Where?

Our aim is to have reliable and talented photographers available all over the world.
